Art Unit: 1644

DETAILED ACTION

1. Claims 1-64 have been canceled.

New Claims 65-80 are pending.

- 2. Upon reconsideration the cancellation of all previously pending claims and the submission of new claims, all previous rejections have been withdrawn.
- 3. The following are new grounds for rejection necessitated by Applicant's amendment.
- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 65-80 are rejected under 35 U.S.C. § 112, first paragraph, as the specification does not contain a written description of the claimed invention, in that the disclosure does not reasonably convey to one skilled in the relevant art that the inventor(s) had possession of the claimed invention at the time the application was filed. This is a new matter rejection.

The specification and the claims as originally filed do not provide support for the invention as now claimed, specifically:

- A) The method of Claim 65 comprising: A method of producing dendritic Langerhans type cells
- B) The method of Claims 65, 71, and 76 comprising: ... c. performing a morphological analysis to demonstrate the presence of dendritic processes in cells of the culture,
- C) The method of Claim 65 and 71 comprising:
 ... d. performing flow cytometric analysis to demonstrate an
 immunophenotype of dendritic Langerhans type cells in cells of
 the culture.

Application/Control Number: 09/800,448

Art Unit: 1644

D) The method of Claim 76 ... culturing mouse peripheral blood monocytes

Regarding A), the specification supports only method of producing mammalian dendritic Langerhans type cells

Regarding B), Applicant cites paragraphs 54, 30 and 31 (presumably of the pre-grant publication) and Figure 1C.

The cites refer to a specific example (Example 6) of producing human Langerhans cells by a specific method comprising more specific steps than are recited in the claims. Said cite cannot support the more generic claims as are instantly recited.

Regarding C), Applicant cites paragraphs 50 and 51 (again, presumably of the pre-grant publication).

The cites are again from Example 6 wherein cytometric analysis is performed on human Langerhans cells employing specific antibodies. Said cite cannot support the more generic claims as are instantly recited.

Regarding D), Applicant cites paragraph 7-13 and 20-24 (again, presumably of the pre-grant publication).

Paragraphs 7-13 do not disclose the use of mouse peripheral blood monocytes in the claimed method. Applicant's argument that paragraph 13 "refers back to the general embodiment that recites peripheral blood monocytes, the blood cells are monocytes", is not persuasive given the fact that paragraph 13 actually discloses "In yet another embodiment" specifically not referring back to anything. Paragraphs 20-24 support only a method employing mouse bone marrow cells and rat platelets.

- 6. No claim is allowed.
- 7. Applicant's amendment or action necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this

Art Unit: 1644

action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 C.F.R. 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.
- 9. Please Note: Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://www.pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197.
